**C. BACKGROUND INFORMATION**

District Update

As part of the Hydrodynamic Study being conducted on Lake Arrowhead, researchers will be on site April 24<sup>th</sup> to install additional monitoring equipment. The dye tracer study is currently being scheduled.

The District has seen a recent uptick in Dropcountr sign ups due to some social media efforts. We typically see a spike in new users during the months of May and June.

The District participated in the AWWA Benchmarking Survey along with 142 other agencies. Preliminary results suggest that LACSD has a strong financial position compared with other districts and a very high cost of energy per unit of water. Once the results are analyzed fully and finalized, we will share the results.

LACSD has applied for a federal grant under the Community Facilities Program to help fund the Corp Yard. This program supports the development of facilities that provide an essential service to rural communities with a population less than 20,000. It has been determined that this project qualifies. An analysis of available funding is currently being conducted.

The next board meeting is scheduled for May 28, 2019.

Community Update

The County will be closing Hospital Road to complete required road improvements. During the project, the District will also be replacing the sewer line. The anticipated start date for the project is September 7, 2019. During the construction, traffic will be rerouted past the site of the District's proposed Corp Yard and MacKay Park.
