C. BACKGROUND INFORMATION

District Update

The District and Arrowhead Lake Association (ALA) held Public Workshops on August 24th and 27th, 2019, to allow the community to receive detailed information regarding the tracer study that is being conducted in Lake Arrowhead. Public feedback was mostly positive. Questions were posed and discussed.

Test drilling is complete at the Hillside Ponds. Results from testing vary from one bore hole to the next. A complete assessment is being completed by the United States Bureau of Reclamation.

An ALA Interface Committee meeting is scheduled for September 30, 2019.

The level of Lake Arrowhead is less than 2 feet below full. This time last year, the lake was almost 9 feet low.

The District received feedback from Lahontan Regional Water Quality Control Board. They are requesting two follow-up items related to the outfall line. They would like the outfall's capacity rated by an engineer and a project plan to eliminate the constrictions that were experienced during this year's heavy weather events.

The next board meeting is scheduled for October 22, 2019.
