**C. BACKGROUND INFORMATION**

Regulatory Updates

The California State Water Resources Control Board postponed the vote on February 20, 2018 to enact the first ever permanent water conservation regulations which would prohibit water practices defined as "wasteful" and "unreasonable." The proposed permanent restrictions are already in place at LACSD. Even if March brings higher than normal precipitation, this water year will probably put the entire state back into a drought status. Snowpack is extremely low but the major reservoirs are full.

A new bill, SB 831, would prohibit agencies from charging fees when a homeowner builds an additional dwelling unit on a property. The agency will be required to provide services without receiving reimbursement for costs incurred. This conflicts with Prop 218 law which requires all rates and fees to be equitable.

District Updates

LACSD will be holding an Open House on the District's 40<sup>th</sup> Anniversary on March 14, 2018 at the Administration Building, at the Bernina Water Treatment Plant and at Grass Valley Wastewater Treatment Plant.

The North Bay Pump Station Replacement project is on schedule. An update from the District Engineer is included in this agenda packet.

The initial analysis being conducted on our wastewater treatment process is nearly complete. Staff will bring their findings to a subsequent board meeting.

A budget workshop will be held for the Board of Directors on April 24, 2018 at 5:30 pm with the regular board meeting following directly afterwards.

The next board meeting will be held on March 27, 2018.
