C. BACKGROUND INFORMATION

District Update

Tidewater completed their groundwater well assessment to determine the feasibility of various locations. As expected, an additional well in the Grass Valley area should be explored. A well at the Blue Jay Administration Building looks promising. A well at the Corp Yard site is worth exploring even though there is no data to predict the productivity. All of the District owned properties in Deer Lodge Park were not suitable. CEQA documents and an engineering RFP are being prepared.

The electrical problems at the Grass Valley Wastewater Treatment Plant have been resolved. The Microvi pilot is being installed June 20th.

Test drilling is continuing at the Hillside Ponds.

The parking lot at the Blue Jay Administration Building will be under construction from July 8th to July 23rd. During that time, staff will be parking offsite.

Below is a status on other current projects:

- #172 Corp Yard Sewer Line, completing punch list items
- #139 GVWWTP Step Screen installation, in testing phase
- #204 I&I Rehab, completion date July 29th
- #195 Manhole Reduction 2019, awarded, being scheduled

- #171 Sewer GIS Update, ongoing
- #164 DLP Waterline Interconnection is in the submittal phase
- #199 Cottage Grove Sewer Repair is being scheduled

The next board meeting is scheduled for July 23, 2019.
